

Charles E. Sharp, Jr., M.D. Tim L. Stone, M.D. Robert P. Goolsby, M.D.

We are currently participating in research studies for migraines and hot flashes. Please read below to see if you could qualify.

Migraine Headache Study

- Male or female patients age 18 – 65 years old with at least a 3-month history of moderate to severe migraines
- Investigating the safety and efficacy of a new, single dose migraine medication
- Requires 3 office visits and 1 telephone follow-up
- Up to \$520 in compensation available for time and travel

Non-Hormonal Hot Flash Study

- Female patients age 40 – 65 years old with moderate to severe hot flash symptoms on a daily basis
- Post-menopausal for 12 months (with no menstrual cycle)
- Investigating the safety and efficacy of a new, non-hormonal (non-estrogen) medication to help with hot flash symptoms
- Requires 8 office visits
- Up to \$600 in compensation available for time and travel

If you would like to learn more about either of these studies, please contact Chanda or Brooke at:

(205) 327-1090
